Popis

Current version of the Dog Registry v.1.0.4
CMS Joomla 5.x

Dogslife -Dog registry, component for CMS Joomla 5.x.

Component (web application) for comprehensive dog registration on a website with the Joomla 5.x CMS

system.

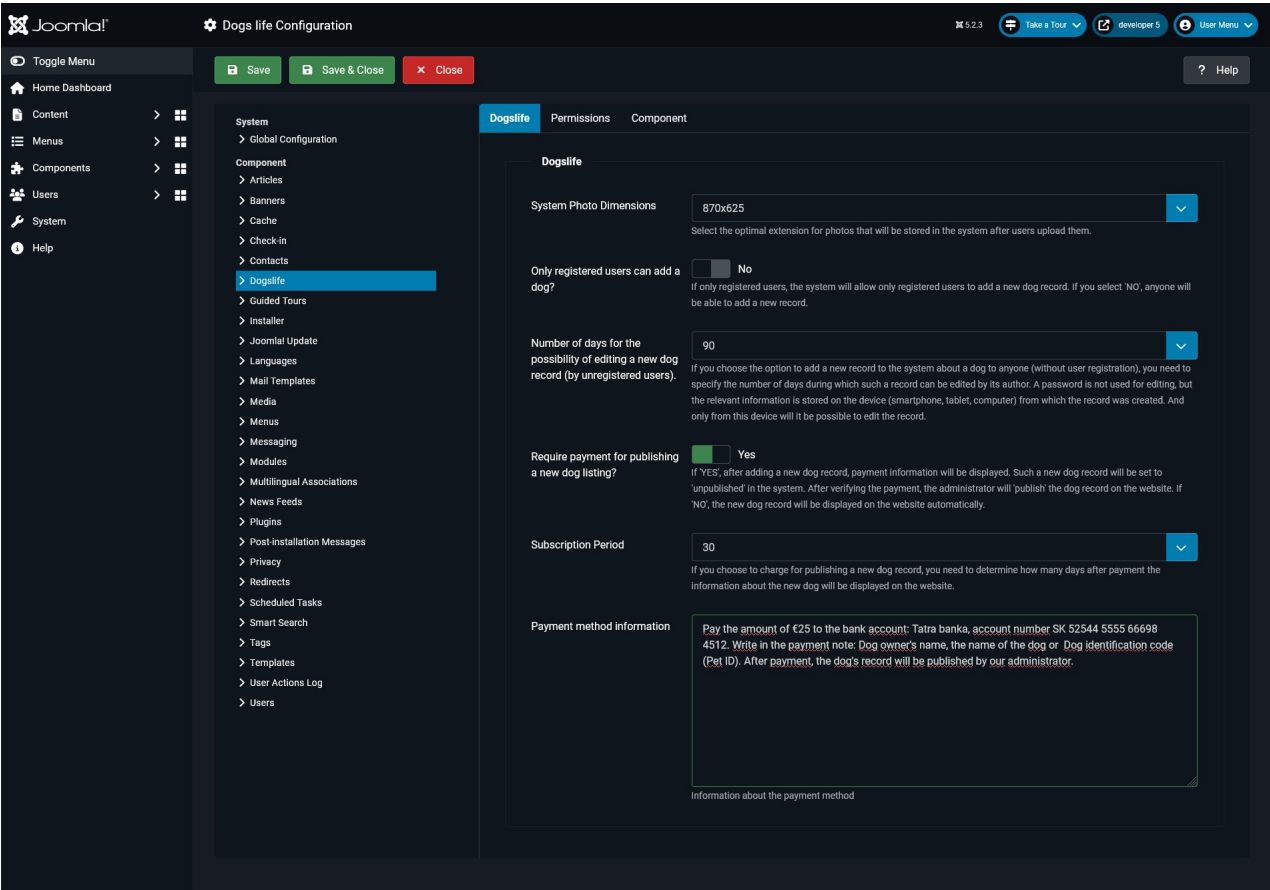

Component functionality:

1. Upload any number of close-up photos of the dog.
2. Ability to set photo upload resolution (for higher server load).
3. Possibility to insert video.
4. Possibility to add a new dog record without the need for user registration.
5. The ability to edit an existing dog record even for an unregistered user (based on the rule that this specific user saved the new dog record in the system).
6. Option to set in the administration (number of days) for which an unregistered user (based on the rule that this specific user saved a new record about a dog in the system) can edit such a record.
7. Option to allow only registered users to add a new dog record.
8. Option to allow a new dog record to be added based on a fee for such a dog record.

Items, record (detail) about the dog:

- Name of the dog's owner.
- System user (if the option is enabled that only registered users can add a new record).
- Dog identification code.
- Date the dog record was added.
- Dog's name.
- The gender of the dog.
- Dog breed.
- Systematics FCI.
- The country where the dog is located.
- The color of the dog's coat.
- The size of the dog.
- The weight of the dog.
- Dog's date of birth.
- Castration.
- Stuttering.
- Racing dog.
- Paid membership expires - expiration date (if the entry is charged).
- Attachment (option to attach a document).
- The dog's tolerance (towards children, other dogs...).
- The nature of the dog.
- Predetermination of dog breeding (interior, exterior...)
- Dog vaccination.
- Dog status (for mating, for sale, gift...).
- Use a dog (sport, shepherd...)
- Information about the dog - TEXT (everything that the author of the entry deems suitable for publication).
- Dog's pedigree.
- Exhibitions (successes, evaluations...).
- Photo gallery.
- Video.
- URL (possibility of inserting a link to the website, the author of the dog entry).

Component settings (backend)
