Current version The Name day calendar Joomla v.1.0.0

CMS Joomla 4,5

The Name day calendar Joomla 4,5.

A module with which you can show your website visitors which of your employees (or in schools - students) has a name day on a given day.

Easily install and configure within one minute. The module shows who has name names (Slovak name calendar) on the relevant day. The module is primarily intended for websites of organizations, businesses, or schools with employees (students). In the administration of the module, it is possible to pre-define the names and surnames of persons from the environment of the module user, and the module will notify on the website on the relevant name day that the employee (student) in question has a name day on this day.

Language versions of the plugin: **SK, GB**

The Name day calendar module contains an interface for automatic updating from the Joomla system administration. In this way, we provide clients who have purchased the services of this product in the future automatically and free of charge to update to the latest versions. This extension is subject to a license [GNU/GPL](#).
