Popis

The screenshot shows the Joomla! administrator interface for configuring the 'Pay By Square' article content field. The 'General' tab is selected, showing fields for Name, Label, Description, Required, Default Value, Predefined data, Variable symbol, Constant symbol, IBAN, and SWIFT. The 'Status' is set to 'Published', 'Field Group' is 'None', 'Category' is 'ZML', 'Access' is 'Public', 'Language' is 'All', and 'Note' is empty.

Current version PAY by square v.1.0.0

CMS Joomla 3 a 4

PAY by square is a standard article content field plugin for CMS Joomla FIELD.

The plugin is systemically implemented in the field (CMS Joomla FIELD), which can be used in the content of any article. If in the article you need to offer visitors (or club members the option to pay for a membership, or for an exhibition or exchange the option to pay an entrance fee, or if you want to accept financial donations...) the option to pay "via QR code", the plugin will generate a QR code that will be inserted into content with an article, the website visitor can scan this code into his banking application, in which all the necessary payment data will be pre-filled and he will pay. Simple and fast.

Plugin - Field, can be placed in every article, or only in selected articles (with content). The plugin (field) can be "centrally" set to a predefined bank account and subsequently use this setting every time you need it, or it is possible to set a different bank account for each individual article.

Jazykové verzie doplnku: **SK, GB**

Plugin PAY by square contains an interface for automatic updating from the Joomla system administration. In this way, we provide clients who have purchased the services of this product in the future automatically and free of charge to update to the latest versions. This extension is subject to a license [GNU/GPL](#).
