### Popis

Hi, How can I help you? A Voice Call on WhatsApp

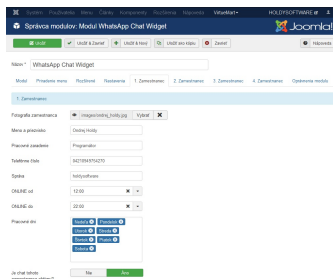

Current version WhatsApp Chat Widget Joomla v.1.0.1  
CMS Joomla 3,4,5

## WhatsApp Chat Widget Joomla 3,4,5.

**A module with which you can enable your website visitors to communicate via WhatsApp Chat with your selected employees.**

The module offers the involvement of up to 4 employees in communication. For each of them, in the administration of the module, it is possible to select a photo, phone number, set the time (and days of the week) from when and until when such an employee is officially available for communication. Outside of the specified time, the relevant employee will not appear on the website for chat. In this way, it is possible to combine individual employees with each other in terms of time (or according to working days of the week) to ensure communication with your clients.

Language versions of the plugin: **SK, GB**

Modul WhatsApp Chat Widget Joomla contains an interface for automatic updating from the Joomla system administration. In this way, we provide clients who have purchased the services of this product in the future automatically and free of charge to update to the latest versions. This extension is subject to a license [GNU/GPL](#).
