Popis

Custom order and invoice numbering for VirtueMart 4

*Renumber
Order and
Invoice
Virtuemart*

v.4.0

CMS Joomla 4 and 5, VirtueMart 4

The plug-in will allow customized new order and new invoice numbers to be generated independently of the VirtueMart 4 system settings (which only generates values in an alphanumeric combination). Plug-in lets you set up, for example, only a combination of purely numeric values for order and invoice generation (which can be used for payments as a variable symbol) or numeric values and custom text (if you select this option and enter the appropriate text) Year with a numeric combination of order (ID) orders, or invoices from the system [VirtueMart](#).

Just plug in the plugin in Joomla 4 and 5, activate it and start using it.

Language versions pluginu: **SK, CZ,GB**

Plugin contains an interface for automatic update from Joomla administration. In this way, we provide customers who have purchased this product in the future automatically and free of charge to update to the latest versions. This plugin is licensed [GNU/GPL](#).
